EDUCATION

University of Washington | Seattle, WA **Expected June 2028**

- *B.S. Human Centered Design and Engineering*| Cumulative GPA: 3.83/4.00
- **Relevant Coursework:** User Research, Inclusive Design & Engineering, UX Prototyping, Computer Science, Intro to Data Science, Computer Science, Visual Communication & Design, Foundations of HCDE (Project Development), Calculus, Psychology, Statistics

EXPERIENCE

Web Development Team Lead | Washington iGEM Club – *University of Washington* **January 2025 - Present**

- Lead a 5-person team developing digital tools and web platforms to showcase synthetic biology research
- Designed and built competition wikis for our annual iGEM project contributing to a Silver Medal in 2025
- *Tools: HTML, CSS, JavaScript, Java, Git*

Web Design Intern | Northwest Sarcoma Foundation – *Remote* **May - August 2025**

- Redesigned and maintained nonprofit website, focusing on improving usability, accessibility, and visual design
- Created wireframes and new layouts that allowed easier internal workflow and content management
- Collaborated effectively with widespread team, using clear communication to balance tasks and deliverables
- *Tools: Figma, HTML, Wix, Wireframing*

TECHINCAL QUALIFICATIONS

User-Centered Design: User Research, User Testing, Prototyping (Low, Mid, High fidelity), Usability Testing, Wire Framing, Storyboarding, User Personas, Co-Designs, Ideation
Programming Languages: Java (proficient), HTML/CSS/JS (proficient), R (proficient), Python (proficient), C++ (proficient), C (familiar), SQL (familiar), ReactJS (familiar), ML (familiar)
Design: Figma, Adobe, Canva, Rhino, Simplify3D

PROJECTS

DALLYDECK: Seattle Event Finding App | Member – *University of Washington* **September 2025 – March 2026**

- Created a high-fidelity mobile app and companion card deck to help users discover and plan activities in Seattle
- Conducted user research (interviews, surveys, journey mapping) to create key features and app flow
- Developed and tested interactive prototype, improving usability through iterative feedback
- *Tools: Figma, Prototyping, User Research, Usability Testing*

Resistor Color Identifier Sheet | Project Lead – *University of Washington* **January – March 2026**

- Designed an information resistor color identifying sheet for colorblind electrical engineering students
- Directed user research with colorblind electrical engineering student, conducted usability testing, semi-structured interviews, storyboarding, and prototyping
- Lead a three-person team, which includes analyzing data and making decisions to direct the trajectory of our project and final design
- *Tools: Figma, Co-Design, User Research, User Testing, Prototyping*

Improving Odegaard Library Study Spaces | Researcher – *University of Washington* **September – December 2026**

- Conducted observational and user-based research on how students use different library floors
- Synthesized insights into actionable design recommendations to improve study space layouts
- *Tools: Google Forms, Excel, User Research (field observations, interviews, surveys)*

ADDITIONAL EXPERIENCE

Cashier | Quality Food Centers (QFC) – *Redmond, WA* **June - September 2025**

- Managed transactions in fast-paced retail environment while maintaining strong customer service
- Developed communication and teamwork skills through daily customer and team interactions
